

ABSOLUTE VALUES

Show only combinations with evalues better than:

In every enzyme/species combination that has a black dot, the particular enzyme was found in that species in Blast with an e-value better than the e-value chosen with the slider (or entered into the field).

- Toggle absolute/relative
- Toggle alphabetical/clustered order

RELATIVE VALUES

Color for relative values: greyscale ▼

The color of every enzyme/species combination indicates the best e-value of the enzyme found in the species by Blast.
